Do you have the DNA of a CTO and love FreightTech?

CON-LINQ is looking for a team player who can see the bigger picture and if necessary, get hands on. A background within product development is required, since the person in our newly created position as CTO, over the next two years must manage our platform's and the development team's exponential growth.

What is CON-LINQ?

Well established 12-year-old Gazelle company which offer one of the markets most advanced RMS and booking software platforms to global and regional freight forwarders. Our solution, fLex, is the only SaaS solution in the market, which make it possible for freight forwarders to organize procurement, give quotes, calculate total freight prices and receive bookings in one combined platform across the most common transport modes; Sea, Air, Road and Courier. With fLex the freight forwarders can, with a minimum of effort, pair the data of their suppliers with the demands of their customers, so they can handle more bookings and spend more time on value-creating activities, rather than doing manual calculations and data entry.

The 8 employees in the company all have extensive knowledge of freight and logistics, which currently are undergoing big digital transformations under the umbrella; "FreightTech". CON-LINQ has recently been selected to be among the Top 10 logistics tech companies in Europe by a leading global logistics magazine.

As CTO you will:

- Manage the technological and functional development of our fLex platform, which is based on Microsoft Azure, Asp.Net, C#, DevExpress and SQL Server
- Be responsible for delivery of all new features in fLex, along with the quality and stability of the existing platform
- Lead, guide and motivate the current team of 6 developers
- Be part of hiring an organization of 5-10 additional team members over the next 12 months
- Make sure that our customers' data is secured according to current law and internal regulations
- Communicate effectively with customers, management and advisory board regarding status on platform development and maintenance

The perfect candidate has:

- Proven ability to manage a team of developers for a product with great complexity
- Experience with software to the freight forwarding and logistics industry
- A maker spirit, which over the last 5-10 years have resulted in consistently delivering quality software on time
- A clear vision for how a great specialized software development department looks like and how we can get there
- Large inclusiveness and a value set in line with the current organization

To the right candidate, we can apart from the salary, offer a warrant agreement. Workplace will be in Søborg (Copenhagen) and a limited amount of travel activity expected.

Please forward your application to cto@con-linq.com. We look forward to hearing from you.
